TOWN WARRANT
THE STATE OF NEW HAMPSHIRE

*To the Inhabitants of the Town of Henniker in the County of
Merrimack in said State qualified to vote in Town Affairs:*
(L.S.)

You are hereby notified to meet at Cogswell High School Auditorium in said Henniker on Tuesday the Tenth day of March, next, at ten of the clock in the morning to act upon the following subjects:

Polls open at 10:00 a.m. and close at 8:00 p.m.

Town Meeting will be recessed for School Meeting at 7:00 p.m.

The articles in the Town Warrant will be taken up at 8:00 p.m.

1. To vote by ballot on the following proposition: Shall the sum of Seventy-five thousand dollars (\$75,000.) be appropriated for procuring final plans and specifications for construction of a sewerage system with treatment facilities and the Selectmen be authorized to borrow said sum under the Municipal Finance Act.

2. To vote by ballot on the following question: Are you in favor of the adoption of the zoning ordinance as proposed by the planning board?
(Copies are on file with Town Clerk.)

3. To choose all necessary Town Officers for the ensuing year.

4. To hear and act upon the reports of town Officers, Library Trustees, Trustees of Trust Funds, and other Committees.

5. To raise and appropriate such sums of money as may be necessary to defray Town Charges for the ensuing year.

6. To see if the Town wishes to exclude from the plan (OASI Agreement) service in any class or classes of positions

of election officials or election workers for a calendar quarter in which the remuneration paid for such service is less than \$50.00.

7. To see if the Town will vote that a secretary be employed to handle office work and other such duties for the Town, thus allowing Town Officers to give their full attention to their official duties. (By Petition).

8. To see what sum of money the Town will vote to raise and appropriate for the repair of highways and bridges, and repair or purchase of machinery.

9. To see what sum of money the Town will vote to raise and appropriate for the construction of the Town Garage.

10. To see what sum of money the Town will vote to raise and appropriate for the purchase of a truck for the Highway Department.

11. To see what action the Town will vote to take regarding the maintenance of sidewalks, and raise and appropriate money for the same.

12. To see if the Town will rescind the action taken in the year 1953, authorizing the Selectmen to appoint a Road Agent, and will vote to have the Road Agent elected by the Town. If this Article is Adopted, the same shall be effective as of March Meeting, 1971. (By Petition).

13. To see if the Town will vote that any Road Agent employed by the Town will neither hold nor accept any other employment which prevents him from giving full supervision to his duties for the Town. (By Petition).

14. To see what action the Town will take in regard to Public Health and raise and appropriate money for the same.

15. To see what sum of money the Town will vote to raise and appropriate to defray the expenses of observing Memorial Day.

16. To see what sum of money the Town will vote to raise and appropriate for the support of Tucker Free Library.

17. To see if the Town will vote to turn over to the Tucker Free Library the remaining material in the hands of the Bicentennial Committee.

18. To see what sum of money the Town will vote to raise and appropriate for maintenance of the Police Department.

19. To see if the Town will rescind its previous method of having the Chief of Police appointed by the Selectmen, and will vote to have the Chief of Police elected by the Town. If this Article is adopted, the same shall be effective as of March Meeting, 1971. (By Petition).

20. To see what sum of money the Town will vote to raise and appropriate for maintenance of the Fire Department.

21. To see what sum of money the Town will vote to raise and appropriate for the purchase of a fire truck.

22. To see what sum of money the Town will vote to raise and appropriate for street lighting for the ensuing year.

23. To see if the Town will vote to accept a street known as Juniper Ridge or take any action relative thereto. (By Petition).

24. To see if the Town will vote to authorize the Selectmen to borrow money in anticipation of taxes.

25. To see what sum of money the Town will vote to raise and appropriate for State Aid Construction of Class V roads.

26. To see what sum of money the Town will vote to raise and appropriate for the Town Disposal Area.

27. To see if the Town will vote to adopt the provisions of RSA 252 relating to sewers.

28. To see what sum of money the Town will vote to raise and appropriate for Old Age Assistance.

29. To see what sum of money the Town will vote to raise and appropriate for the support of the Concord Hospital.

30. To see what sum of money the Town will vote to raise and appropriate for legal services.

31. To see what sum of money the Town will vote to raise and appropriate for the District Court.

32. To see what sum of money the Town will vote to raise and appropriate for Workmen's Compensation.

33. To see what sum of money the Town will vote to raise and appropriate for the support of the Henniker Community Center.

34. To see what sum of money the Town will vote to raise and appropriate for repairs at the Community Center.

35. To see what sum of money the Town will vote to raise and appropriate to prevent the spread of White Pine Blister.

36. To see what sum of money the Town will vote to raise and appropriate for Civil Defense.

37. To see what sum of money the Town will vote to raise and appropriate to defray the expenses of the Planning Board.

38. To see if the Town will vote to accept the names of all streets and roads as proposed by the Planning Board, or take any action relative thereto.

39. To see if the Town will vote to authorize and empower the Planning Board to approve or disapprove in its discretion new subdivisions and plats thereof showing streets, or the widening thereof, or parks as provided in Chapter 36 of the New Hampshire Revised Statutes Annotated, 1955.

40. To see if the Town will vote to establish a Town Conservation Commission as set forth in R.S.A. 36-a and that the Selectmen appoint said Commission.

41. To see if the Town will vote to join in Regional Planning, and raise and appropriate money for the same.

42. To see if the Town will vote to have a complete reappraisal of the Town made by the State Tax Commission, or

a private firm, and raise and appropriate money for the same.

43. To see if the Town will vote to raise and appropriate a sum of money for a Highway Equipment Fund.

44. To see if the Town will vote to raise and appropriate the sum of \$25 for the support of the Merrimack Valley Region Association.

45. To see if the Town will vote to authorize the Selectmen to advertise and sell by sealed bid the Etta Townes Lot. (By Request).

46. It is proposed by the undersigned, that the residents be informed as to the proposals, actions and financial transactions concerning the "Keyser Pond Dispute". Signed by Frank Blanchette, Floyd E. Colby, Wilfred French, George F. Howe, Sr., Durwood A. French, Laura Carlson, Ruth Kienia, Foster Herrick, Louise Hamm, Virgil Houghton, Jr., Ronald Ashford, Marion Lemire and Agnes Champney and Maria Ashford.

47. To transact any other business that may properly come before this meeting.

Given under our hands and seal this 17th day of February, in the year of our Lord nineteen hundred and seventy.

GORDON C. HULBERT,
ROBERTS B. EDWARDS,
STEPHEN C. BENNETT,
Selectmen of Henniker

A true copy of Warrant—Attest:

ROBERTS B. EDWARDS,
STEPHEN C. BENNETT,
Selectmen of Henniker

**REPORT OF THE SEWERAGE AND
SEWAGE TREATMENT ADVISORY COMMITTEE**

The following Committee report was made as a basis for a Consultant Interim Report updating the Fenton G. Keyes Preliminary Sewer Report. The interim report was required by the N. H. Water Supply and Pollution Control Commission as of that date.

November 20, 1969

SUBJECT: Sewerage and Sewage Treatment

TO: Selectmen of Henniker

FROM: Advisory Committee

Your committee was authorized by the 1968 Town Meeting to advise and consult with you on a proposed plan of town sewerage and sewage treatment to be presented at the next Town Meeting. Since March we have met 10 times, twice with you and several times with representatives of the N. H. Water Supply and Pollution Control Commission and the consultants. As individuals we have also consulted others on this problem. Our purpose has been to ascertain the general situation and to make detailed review of the Preliminary Engineering Survey and Report prepared for Henniker in 1965 by Fenton G. Keyes Associates of Providence, R. I.

It is clear that the Town must take some action at the next regular meeting, as we stand under a State order to abate pollution of the Contoocook by July 1970. In addition, you gentlemen have given written assurance that you would support measures to abate pollution as a condition of variances granted for New England College to connect to existing sewer outfalls. It would appear that additional major college construction is not feasible until we have sewage treatment.

It soon became evident in our review of the Preliminary Report of 1965 that extensive updating, additional comparative studies, etc., was needed. This is necessary both to answer comments of the Committee, and to meet current revised requirements of the State. Such an updating study constitutes an Interim Report, and will be required by the State in our case prior to the final design. For us, it would be very useful before next Town Meeting to assist decision on appropriate actions, hold required Public Hearings, etc.

By October the Committee concurred that it was appropriate and practical that Fenton Keyes Associates continue service to the Town. On November 6, 1969, in meeting with their representatives and you gentlemen it was agreed that work on the Interim Report could be promptly undertaken on a contingent basis. The Interim Report is to be in hand in early January of 1970, in time for necessary actions before Town Meeting. Committee comments to date were to be written up for their use, together with the current criteria and requirements of the N. H. WS&PCC.

Review comments hereafter follow generally the sequence of the Preliminary Report.

1. Page 3, pp 2. It should be noted that the development of the Hopkinton Flood Control Reservoir and land takings to elevation 420 precluded economical development of gravity sewerage and lagoon treatment. This forms the basis of a claim against the Merrimack River Flood Damage Commission which had initial presentation to that body October 22, 1969 by representatives of the Selectmen, Committee, and consultants. This public hearing is to be followed up by preparation of the exhibits and analysis which it was then agreed would be filed with them.

2. Page 3, Section 3. It is noted that areas of septic tank distress now exist, (notably at Fairview Avenue.) Additional indirect polluting outlets may exist.

3. Page 6, pp 3. See comment 1, above.

4. Page 7, pp 1. Update design year 1990 to 1995 and 2015 to 2020.

5. Page 8. Update population predictions including college enrollment.

6. Page 9. Secure current written NEC population prediction, now being re-projected by college committee study. The administrator of another, larger college recently advised that the next efficient population for a small college as an administrative unit after 800 is 1800.

7. Page 10. Update water consumption estimates. Estimates of ground water infiltration into existing sewers should be made, based on measurements. (Mr. Holton will try to do some measuring work with college students.) N. H. WS&PCC representatives have indicated such estimates would be required for the Interim Report, and your committee feels such indications are necessary for judgments concerning lateral replacements at the time of interceptor construction.

8. Page 11. The detailed Merrimack County Soil Survey and Report has been completed since the Preliminary Report, and is the standard reference for preliminary soils data.

9. Page 13. On catch basins, see following comment on separation of stream and sanitary flows.

10. Page 14. Design year should be updated.

The committee concurs that Contoocook Valley Paper Company should be considered a separate problem.

11. Page 15, 16, 17. It is questioned whether further detailed analysis of the paper company industrial waste problem is indicated. A N. H. WS&PCC staff member has indicated the State will proceed against that industry as a separate polluter of the river.

12. Page 18. As of current date, this Committee is advised primary sewage treatment with fresh solids dewatering would not be acceptable to State. Oxidation ditches would be acceptable on the same basis as an extended aeration plant, and the Committee feels they should be comparatively analyzed.

13. Page 19, 20. Difficulty of siting lagoon relates to claim. Committee does not feel lagoons on the Ramsdell Road site

are an acceptable alternative. The land and easements which have been acquired for this site should be reviewed by consultant for adequacy. It is believed easements for a sewer outfall from this site, and others, will have to be procured from the Corps of Engineers. If so, action should be started early.

14. Page 23. Contoocook River now classified 8. See comment 12 on acceptable treatment systems. The nature of sand filtration as tertiary stage should be further explored. Could this be natural leaching from a holding pond through trench to river, rather than pipe lines? Material at site appears favorable.

State representatives have mentioned nutrient removal as a requirement. This must be explored with them.

Current criteria on updated designed year BOD loading should be checked. State said 0.22 pounds per person per day.

Primary treatments not acceptable under current federal regulations.

15. Page 25-27. Review and update oxidation pond.

16. Page 27-33. Review and update Extended Aeration Sewage Treatment Plans. See comment 14 above on Sand Filtration. Make full analysis and estimate oxidation ditch alternative treatment.

17. Page 34-39. Update as required. The Committee concurs in the general scheme of Interceptor Sewers, but feels that every effort should be made in final design to reduce cost by eliminating a Pumping Station. It has seemed possible in preliminary examination that a satisfactory way could be found to consolidate Pumping Stations 1 and 2. It is felt that Interceptor "E" should be included in present planning, particularly if Interceptor "A" cannot reach to Colby Hill Road.

More detailed study is needed on laterals, for which there is no State or Federal Aid unless Farm Home Administration Aid can be secured. (Formal application for this aid should be made as soon as good costs are available.) So far, the Committee has felt that the Depot Hill lateral should be staged,

as there is no evidence of faculty housing yet; the Hall Avenue cross connection to Maple Street might be eliminated and direct connection to the existing Maple Street lateral made; the sewer replacement work done by the State during the improvement of Maple Street should be investigated and evaluated; the Fairview Avenue branch laterals might be joined with an extension up the development road to the north; a short lateral up Colby Hill Road should be considered; extension up Rush Road should be stage designed now to the limit of gravity service, in view of development in this area, and a full replacement of the Rush Road lateral should be considered.

N. H. WS&PCC representatives have given differing indications on whether storm and sanitary flows must be separated. The Committee feels this is good practice and desirable, and thinks final design should explore at least a separation of the major flows, making use if possible of existing piping and outfalls to the river.

The Committee has questions on other laterals, and intends further study.

18. Page 39-41. Estimates of cost require updating.

19. Page 42-48. Financing the proposed system.

The Committee concurs (1) that it is equitable for the cost of pollution abatement, that is the interceptor sewers, pumping stations and treatment facility, to be paid for by the town in general. This major share of the total project is eligible for State and Federal Aid now to the extent of 90% (95% if procedures are through a Regional Planning Commission, and a regional benefit can be shown to accrue through the project. The Central N. H. Regional Planning Commission has just been organized, and this avenue should be explored and necessary action taken at Town Meeting to permit action through it, if indicated); (2) that the capital costs of the balance of the project, (laterals, etc.) be paid for by the users of special assessment based on future connecting population in the case of the college, and an equitable schedule based on

use of the connected premises for others. (FHA Aid may be available for this portion of the project. See preceeding remarks). The special assessment to be spread over the financing period if the user desires; (3) that operating costs be borne by the users through an annual use charge. In this regard, it should be noted that since action by the Town Meeting in 1955, all costs of public sewers have presumably been collected from the users by rental charges assessed by the Selectmen; (4) that financial analysis should be based on 25 year bond amortization schedules, probably. (Possibly 30 years, in view of the combined expected life of all system elements).

20. Page 48-52. Operation of System.

N. H. WS&PCC representatives have advised that the equivalent of one full time employee should be anticipated. It is felt that the annual charge should be based on use of the premises, rather than being a flat charge. Your Committee discussed installation of water meters as a basis for sewer rents but saw more difficulties than benefits. It is felt that the college service charge should be population-based.

The Committee feels that work should be begun at once on drafting the Sewer Ordinances, so that they may be fully in accord with the design of the system and protect it in service. We believe the State has additional provisions to be considered for inclusion.

21. Page 52-56. Conclusions and Recommendations. It is believed that previous comments touch on the points covered. Several will require revision. It is noted that the Town will have to bond for the total amount of the project, ultimately.

Plans should be updated to show presently existing buildings and proposed college construction, and current concepts in general.

Careful attention is needed now to the next immediate step, to be proposed at Town Meeting in 1970.

In general, the Committee feels that with a satisfactory updating Interim Report in hand and approved by the N. H.

WS&PCC, the reports could be accepted by the Town as the basis for final design.

Since November of 1969 the N. H. Water Supply and Pollution Control Commission has lifted the requirement for a formal Interim Report and agreed that the matters it would cover, including those listed above, could be handled in the early stages of final design. After a great deal of discussion the Commission has agreed that nutrient stripping, which is primarily phosphate removal in the treatment process, is not a present requirement. This type of treatment would have increased costs sharply. The Commissions' staff has, however, recommended additional study of the feasibility and economics of municipal treatment of the paper mill wastes.

The extent of lateral sewers, determination by State and Federal approvals of what sewers will be eligible for aid as interceptors, detailed schedules of cost assessment to users, and many other matters need detailed working out by our consultant engineers for understanding and acceptance before we proceed to construction of the project.

The Committee and Selectmen have acted by the Public Hearing of February 7, 1970 to propose bonding to procure final plans and specifications. While this will not abate pollution of the Contoocook River and tributary streams by July of 1970, it will be progress to that end at the fastest rate reasonably possible.

The Committee recommends that our Preliminary Report on Sewerage and Sewage Treatment of 1965, as modified by comments above, be accepted as the basis for final design.

Respectfully submitted,

GEORGE SANBORN, *Chairman*
 VERNON KNOWLTON, *Clerk*
 LESTER CONNOR
 RALPH STARKIE

AUDITORS' REPORT

We, the undersigned Auditors of the Town of Henniker, hereby certify that we have examined the books and accounts of the Selectmen, Town Clerk, Town Treasurer, Collector of Taxes, Agent for Memorial Day Appropriation, District Court, Treasurer of Tucker Free Library, Board of Trustees of Trust Funds including Securities as tabulated in the report, and deposits in Savings Banks and National Banks, Collector of Water Rents, Clerk and Treasurer of Water Commissioners, Park Board, also Community Center and Bicentennial Committee, and find the same correctly cast and properly vouched.

LESTER E. CONNOR,

ROBERT T. FRENCH,

ARTHUR S. HADLEY,

Auditors

HEALTH OFFICER'S REPORT

December 31, 1969

SELECTMEN

Town of Henniker
Henniker, New Hampshire

Dear Sirs;

During the past year, the health of the persons residing in this community has been good to excellent, with the exception of expected winter ills such as flu and viruses. Sparsely isolated cases of childhood diseases were reported and were held to a minimum thus preventing any danger of epidemics.

Investigations relative to potential health hazards were conducted, and if found valid, the responsible parties were requested to remedy the situation.

Numerous public gathering places were inspected, which constituted recommendations relative to corrections in order to help prevent any sickness to persons patronizing same.

The bi-monthly water samples of the Cogswell Spring Water Works were tested by the State Board of Health, Concord, N. H., and all were found to be satisfactory.

On November 12, 1969, the State Board of Health, portable x-ray unit was stationed in front of the New England College Administration Office, whereby 476 persons, on a voluntary basis, were given free chest x-rays. The reports were sent to each individual and if further x-rays were recommended, a notice was forwarded to each persons stated physician.

Respectfully Submitted,

GEORGE M. PARMENTER, SR.
Health Officer
Town of Henniker, N. H.

VERNON A. KNOWLTON,

Clerk of Court

NOTE: The criminal cases classified in Division II and the Civil cases classified in Division VI are in part the cases included in the preceding Divisions I and V, and the classification is for the purpose of developing the character and disposition of cases coming before the Court during the year.

HENNIKER POLICE DEPARTMENT

As a result of a thorough re-evaluation of the need for improved traffic control devices throughout the Town of Henniker, the Police Department, with the cooperation of the State Highway Department, instituted numerous improvements to insure the safe movement of both vehicle and pedestrian traffic. Due to the erratic characteristics of the highway, especially in the area of our schools, markings were placed in the roadway and signs erected.

A pedestrian safety education program was instituted on the elementary level which included a performance co-sponsored by the International Association of Chiefs of Police and the American Trucking Association. A Police Officer is on school crossing duty each morning and afternoon that school is in session. His presence has assured the safe movement of children and school buses in addition to facilitating the orderly flow of vehicular traffic. Initial steps have been taken to organize a School Crossing Patrol which hopefully will be in effect in the very near future.

To further aid pedestrian safety and assure the smooth movement of traffic a flashing signal, located in the center of town, previously indicated a three way stop and one way caution. This situation was deemed extremely confusing to both pedestrians and motorist alike. Again, through the cooperation of the State Highway Department, this condition has been rectified. This device now indicates a north-south stop and an east-west caution.

Emphasis has also been placed on the effectiveness of routine police patrol. The Police Department has established a policy of night patrol on a seven day per week schedule. This program necessitates the expansion of man hours plus additional mileage, however the results of this project have proven to be very effective. This fact has been reflected by the decrease in vehicular and pedestrian accidents and the increase in the apprehension of motor vehicle law violators. During

this period a total of thirty eight summons were issued for moving violations, speed, stop sign, etc. Periodic vehicle inspection checks have been conducted during both daylight and evening hours. These checks resulted in the issuance of three summons for unsafe tires in addition to seven warnings presented for various minor defective equipment.

On November 15, 1969 the communications system of the Police Department was greatly expanded through the installation of a remote radio network which is manned on a twenty four hour basis through the Contoocook Valley Telephone Company. The present system consists of a base station which is located at the residence of the Chief of Police, a mobile unit in the cruiser, in addition to mobile units in the private vehicles of the two most active Special Officers. The local ambulance and the town Highway Agent are also equipped with mobile units. Police calls are received and dispatched through the telephone company. This system, while operated in conjunction with the State Police radio, affords this community with an excellent means of communication assuring the prompt action of various agencies in time of emergency.

STATISTICS FOR THE PERIOD

September 15, — December 31, 1969

Burglary	4

Abandoned Children	1
Narcotics and Drug Abuse Violations	1
Misc. Police Assistance	57

The members of the Henniker Police Department wish to express their sincere thanks to all the members of the community for the cooperation extended to this Department and trust that we shall continue to merit your support.

Respectfully submitted,

THOMAS W. HASSLER,

Chief of Police

REPORT OF THE FOREST FIRE WARDEN AND DISTRICT CHIEF

The 1969 fire season was a quiet one in this area. Frequent rains kept the danger to a minimum and there were few violations. Your Forest Fire Warden's job would be easier if everyone understood the State laws that govern the kindling of outdoor fires. A synopsis of these laws follow:

Fire Permit

A *fire permit* is needed for all outdoor fires in or near woodland anytime the ground is not covered with snow. This includes household waste burning, even if in an incinerator, grass burning, garden trash as well as brush burning. Such burning is restricted by regulation to be prior to 9:00 a.m. and after 5:00 p.m.

Exceptions

Commercial or industrial burning is allowed anytime under normal conditions with permission of the District Chief and a permit from the Fire Warden.

Camp or cooking fires are allowed on your own property with permission of the Fire Warden. On another's property with written permission of the landowner and permission of the Fire Warden. The Warden can forbid such fires if in a hazardous area. Permits for cooking fires in the White Mountain National Forest can be obtained from the Laconia Office or at the Ranger Stations. Permits are not required in public camp or picnic grounds where fireplaces have been built for this purpose.

Penalties

1. For kindling a fire without a permit. Maximum of \$200.00 fine; or imprisonment for not more than 60 days.

2. For kindling a fire by any means willfully or recklessly that shall endanger woodlands the maximum fine is \$500.00 or one year's imprisonment.
3. For failure to totally extinguish a camp or cooking fire before leaving it the same penalties as in (1) above.
4. For dropping inflammable material in or near woodland maximum fine of \$25.00.

Fire prevention is a personal matter and a good habit. Keep our town free from smokes in 1970.

REPORT OF THE TRUSTEES OF TUCKER FREE LIBRARY

Our library has enjoyed another successful year, due almost entirely to the dedication and enthusiastic cooperation of everyone concerned. Part of the library's success, of course, is based on the fact that Henniker people like to read and that a library has existed in town almost from its very beginning.

The purpose of the library is to serve the needs of the community and we judge our success on two factors — the response of the public to the facilities we offer, and the annual statistical report prepared by the New Hampshire State Library. Although lists of numbers are not particularly interesting to most people, we think you may like to know that Henniker ranked fourth in the state among towns with a population of under 2000 in the number of books read per capita in 1968, with a figure of 22.1. (How one reads one tenth of a book the report does not say.) The total cost of our library to the town was third from the top among the four with the highest reading per capita, or \$5,108.25. The cost per person of our library was the least in this group, which ranged from \$38.26 for New Hampton to our own figure of \$4.31 per person. In other words, we feel we did an excellent job of getting a lot of books to a lot of people at a pleasantly low cost.

Perhaps the largest single of the year was the dedication of the Francis Lane Childs Historical room, which was held on November 8, 1969. At that time the room had been changed from what was essentially an unfinished, dirt-floored storage place to one with a beam and plaster ceiling, a cement floor with proper drainage facilities, and lighting installed. These major steps of construction were completed at a cost of around \$2,000 of the original \$5,000 given by the town to complete the room. A large group of volunteers worked in the library before the dedication to "dress-up" the room and

give visitors an impression of the effect it will make when finished. It would be impractical to list the names here of all those who cooperated to make the evening a success, with a crowd slightly too large to be accommodated within the historical room itself, but this list has been preserved in our files. The entire program, with Dr. Childs as speaker, a dedication by Mark Greenly, Karla Connor and Dean Morrison, III, a presentation of the key to the room to Alice Patenaude and Stephen Bracy by Diamond Maxwell, the guest book by members of the Village Dancers, and delightful refreshments by Mrs. Mattie Edmunds, was video-taped by Robert Jewell. A special feature of the evening was the publication of a history of the Tucker Free Library written by Mrs. Willa Brigham and illustrated by Mrs. Masha Grant, III. Mrs. Brigham was appointed Curator of the Francis Lane Childs Historical Room this year, and is finishing final designs for the interior of the room, which will be completed by Forrest Morse in anticipation of the formal opening this spring.

One of the continuing goals of the library is to achieve closer cooperation between the town schools and the library. Our children's reading program, directed by the Friends of the Library, is active during the year and has special summer projects for the children of the community. The library asks teachers in the school to suggest book purchases which will fit the interests of the students and loans books to the school on an extended basis when requested. It is our hope that our library, while remaining a public library, can be used to fill the needs of our schools for a library to extend and enrich their study program.

Our librarians, John and Evelyn Hollis, are to be highly commended for their endless hours of work in the library, for their regular attendance at state and regional library meetings, for their thoughtful selection of books to please Henniker readers, and for their dedication to a job well done for which no amount of money could pay. Our custodian, Harold Stewart, does an excellent job of managing the physical plant of the library and is always happy to take the extra tasks that arise during the year. These three, and the Friends

of the Library, coordinate their efforts to give our town a library of which it can be proud.

Respectfully submitted,

DUANE SANBORN, *Chairman*

STANLEY BRACY, *Secretary*

ANNUAL REPORT

HENNIKER PLANNING BOARD

The Board holds regular meetings on the third Tuesday of each month and special meetings as needed. Interested citizens are always welcome at these meetings.

January and February meetings were devoted to getting the sewer project ready for Town Meeting. At the meeting the proposal was postponed. A committee of seven was set up, with the Planning Board secretary as a member, to report findings to the town. This committee has been very active this year.

At the March meeting two proposals were received. The first came from Ernest Bergh, Jr. He made some suggestions regarding the Henniker Highway Dept. These were taken under advisement by the Board and the Selectmen. The second came from Calvin Tucker. He proposed that a new municipal building be planned for the town on the present site of the Fire Station and the old Telephone Block. The building to contain the Fire Dept., Police Dept., Selectmen, Town Clerk & Tax Collector, and the District Court. The purpose being — all town records in one fireproof building. A good project to plan for the future.

The April and May meetings consisted of a discussion of the Highway Dept. and Police Dept. Complaints were received as the paper mill open storage. A revision of our zoning ordinance was started. Bob Goss chaired a sub-committee on this.

In June the street map was revised and several changes were proposed on the Zoning Ordinance.

At the September meeting it was decided to print and distribute the street map for correction by townspeople. The Boy Scouts volunteered to make the distribution.

The October and November meeting produced a new zoning map showing the residential area as bounded by the Water System limits. It was decided to drop the recreational districts.

On November 17 the Selectmen and Planning Board members attended the 15-town Central New Hampshire Region meeting. Henniker is a part of the region. An article will be in the town warrant to support the region. Many benefits accrue to the Town as a result.

Two December meetings finalized plans for January and February hearings on various proposals for town meeting.

Respectfully submitted,

A. HOLTON, *Secretary*

ANNUAL REPORT OF THE HENNIKER COMMUNITY CENTER

The Henniker Community Center during the past year has substantially reduced its operation to a point of becoming a youth program sponsor. No new activities have been undertaken and at present no use is being made of our facilities except for storage.

As many of you know just prior to Town Meeting in 1969, the Fire Marshal's office closed the second floor to use until certain items were corrected. During that Town Meeting funds were provided to make these repairs however since there has been no need for this floor the expenditure of these were unjustifiable.

With the moving of the Kindergarten this spring, no new use has been made of this building and at present the heat and water has been cut off.

The Little League Baseball and Basketball programs continue to be well attended by the boys in Town but by few Townspeople. The Henniker Green Giants (Men's Basketball Team) is attracting more interest than before but still needs your support. We believe these sports programs have helped to stimulate the sporting interest that is reflected in our school sports program.

In the coming year we hope more activities can be held at our Center. We request that the necessary funds to place the building in a useable condition be kept on hand should they be needed. The 1969 Financial Statement is as follows;

Cash on hand January 1, 1969	\$ 658.29

Henniker School District

SCHOOL WARRANT

To the Inhabitants of the School District in the Town of Henniker qualified to vote in district affairs:

You are hereby notified to meet at the Cogswell School Auditorium in said district on Tuesday, the 10th day of March, 1970 at 10 o'clock in the forenoon to act upon the following subjects:

1. To choose by non-partisan ballot the following school district officials with the polls to open at 10:00 a.m. and close at 8:00 p.m.

A. Moderator — ensuing year.

B. Clerk — ensuing year.

C. Treasurer — ensuing year.

D. School Board Member for the ensuing three years.

E. Auditors — ensuing year.

Article II — to be acted on at 7:00 P.M.

2. To hear the reports of agents, auditors, committees and officers chosen and to take any action relating to.

3. To choose agents and committees in relation to any subject embraced in this warrant.

4. To see what sum of money the district will vote to raise and appropriate for the support of schools, for payment of

salaries for school district officials and agents and for the payment of statutory obligations of the district.

5. To see if the district will vote to authorize the school board to make application for, and accept on behalf of the district, any and all grants or other funds for education purposes which may now or hereafter be forthcoming from the United States Government or from the State of New Hampshire for the school year 1970-71.

6. To see if the district will raise and appropriate the sum of \$1,731.50 to operate a class for mentally retarded children in conjunction with the other districts in Supervisory Union No. 24. Sponsored by Supervisory Union No. 24.

7. To see if the district will raise and appropriate the sum of \$1,000.00 as a contingency fund for the 1970-71 school year.

8. To transact any other business that may legally come before said meeting.

Given under our hands this 14th day of February 1970 at said Henniker.

PRINCIPAL'S REPORT

Several important developments have occurred this past year in the Elementary School System. Foremost among these developments was the opening of Henniker's first public kindergarten which has added a new dimension to our school system. In addition, with the cooperation of New England College a program has been implemented which provides tutoring for many students who need individual assistance. A new elementary school grading procedure was adopted which encourages more parent-teacher conferences. The hiring of a teacher aide has been of great assistance in providing a qualitative experience for the students. Considerable time and effort are presently being spent in an attempt to re-evaluate and re-structure the whole reading program in order to best serve the needs of all the elementary school pupils. Overall, these developments promise to pay increasing dividends for each student in the future.

The High School program has been advanced by the adoption of a Junior High School tutorial program, implementation of new social studies methods and organization, continued work on individualized mathematics, and the continued excellence of the industrial arts program. In addition, considerable time is being spent by the staff in an effort to develop an effective grading system for the High School students. In the area of pupil guidance, a program of teacher-fellows has been adopted and several staff meetings held in order to provide the most effective type of educational experience for each and every student.

In the area of student affairs a new dress code and new disciplinary policy have been implemented and have proven successful. The Student-Faculty Senate has become of increasing importance in providing a cooperative framework for the whole school community to work in. In its second year of existence the enrichment program has maintained its popular-

ity and success with both students and staff. The whole school has looked with pride at the N. H. Council for Better Schools major achievement award and the N. H. School Citizenship Project award which were given to Henniker for the development of the enrichment program and the Student-Faculty Senate.

The Open House program was expanded and was highly successful again this year. We have been able to expand our contact with parents through the use of printed handbooks, parent meetings, and the publication of a bi-monthly Parents Newsletter. This past year also saw the institution of Henniker's first Adult Education program which enrolled some seventy-five persons.

Henniker High athletic teams had a very successful year, with the soccer team having its first winning season, Granite League championships were earned by the girl's softball team, baseball team and the boys' varsity squad. The boys' varsity also made it to the semi-finals of the state class S tournament. The school would like to express its gratitude to the town for the glass backboards and to all who supported the drive for new athletic uniforms.

Significant progress was made during the past year and with the continued support of townspeople, parents, students and staff there can be every expectation that the Henniker school system will enter the 1970's with reasonable satisfaction with the past and renewed hopes for the future.

Respectfully submitted,

THOMAS J. Watman,
Principal

SUPERINTENDENT'S REPORT

Sometime in the long, dim distant past someone conceived the idea that the superintendent of schools should write an annual report to be published in the annual school report. The content of most of these reports has been pretty much as the term conotates i.e., a recitation of past happenings, and I don't use that term in the sense it is presently being used by some segments of our society.

I have never given it much thought, but a review of my reports, over the years, will reveal that I have ignored the strict interpretation of the word "report", but instead have spent my time gazing wistfully into the future, predicting ominous happenings — there goes that word again — and occasionally prognostigating accurately the dire consequences of procrastination.

I feel no compulsion to change my strategy as I approach the conclusion of my tenure but I will attempt to look back as I look ahead. This assumes that I will be temporarily blessed with much greater physical capabilities than Cyclops.

Education used to concern itself with the Three R's or what is now called the basics and for the agrarian society of the early days of our country the ability to read and cypher a bit was adequate. However, little by little the great strides in technical knowledge began to make life more complicated and educators, in an attempt to meet the needs of society, changed their emphasis from basic education to educating the whole child.

It was at this point where we ran into trouble. At first educational proponants of change had little trouble in selling new ideas in teaching. We dropped phonics for sight reading, we joined History, Geography and other basic courses in the social science area and taught social studies, we adopted the so-called new-math, we ungraded classes, we involved the

Joplin Plan, we departmentalized our elementary schools, we instituted CBA Chemistry and PSSC Physics and made a raft of other assorted changes in an attempt to keep abreast of the needs of mankind in this ever changing and growing complex world. As our changes were put into effect we learned at least one thing and that is that there is a great deal of truth in the old adage, "that what is good for the goose is not always good for the gander". We have known right along that all youngsters are not alike but in too many instances we tried to place them in the same program and while some youngsters profited from their new experiences an equal number suffered from them. Today we have almost as many answers to educational problems as we have educators and probably the answers are correct when we talk about a particular child or a particular group of children.

There are those who would say that educational practices have gone from slight confusion to chaos but I don't quite buy that. Educators have made a sincere effort to improve the product of their efforts but lacking specific goals and the present desires on the part of parents and student to achieve beyond their capacities to do so have confused the picture to the extent education is probably overly critized.

It may be that educators in an attempt to solve the complexities of the learning process have taken themselves too seriously and need to go back to the basic education philosophy and use the knowledge gained during that period of "great experimentalization" when and where there is merit in doing so.

The above was written with full knowledge that in many instances that is just what we are doing. We find phonics has returned to its rightful place in the teaching of reading; we have found that the new math isn't for everyone and are adjusting to its use; we have found out that the new emphasis in several subject areas has merit for certain youngsters but that the old emphasis provided a better contribution to a sizable group. What I am saying is that educators the same as scientist have to experiment with new ideas; but unlike sci-

ence which can usually be worked out by formula prior to experimentation, children are individuals and rarely react the same to the presented motivation even though often similar. Educators are not as confused as to where they are going and how they are going to get there as it sometimes may appear but are moving forward even though at times it appears to be in a somewhat disorderly fashion.

If given a chance, I predict that the next twenty-five years will see great progress on the part of the educator to improve the learning process and I regret that I shall not be a part of it.

Some of the above was written with "tongue in cheek". It was an attempt to express some truths, to make light some of our experimental errors and to express confidence that education is progressing as fast as most segments of our society outside of the field of technology.

In closing, I do want to express my gratitude to the many school board members with whom I have worked; the excellent office staff, with which I have always been blessed, the hundreds of teachers with whom I have been associated, the citizens, without whose support our schools could not have operated and last, but certainly not least, Polly, who never complained once about those hundreds of evenings she spent alone while I attended meetings, for making my tenure enjoyable; a simple and sincere THANKS!

Respectfully submitted,

NORMAN R. HARTFIEL,
Superintendent of Schools

HENNIKER SCHOOL DISTRICT

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Members of the School Board of the Henniker School District:

The following staff are employed for the school year 1969-70:

Teacher and Subject	Training	Year of Grad.	Salary
Mr. Frank Butler Business Education	Husson College	1969	5,900
Mrs. Margaret Ebert Music	Alma College	1959	2,100
Mr. Ronald Elliott Industrial Arts	Keene State College	1961	8,450
Mr. Frank Foley English	Nasson College	1968	6,000
Mrs. Carol Hamilton Physical Education	Springfield College	1959	2,250
Mr. George Hamilton Physical Education	Springfield College	1959	1,100
Mr. Thomas Kimball Math	Denison University	1961	8,300
Mrs. Karen Kossove Home Economics	New York University	1969	6,150
Miss Sharyn Leh French	Lake Erie College	1969	5,900
Mr. John Maxfield Science	Dartmouth College	1968	5,900
Mr. Terry Paul English & Soc. Studies	New England College	1966	6,750
Mr. Robert Scully English & Soc. Studies	St. Anselm's College	1958	9,000
Mrs. Marion Shay Math & Science	Keene State College	1959	8,000

Mr. Walter Sidney Social Studies	Plymouth State College 1964	7,250
Mr. Thomas Watman Principal	University of N. H. 1968(M.A.)	11,500

HENNIKER GRADE SCHOOL TEACHERS

Mr. Stephen Brindisi Grade 6	New England College 1962	6,100
Mrs. Hazel Gilbert Title I	Keene State College 1932	4,000
Mrs. Gail Heald Grade 3	Lesley College 1969	5,900
Mrs. Thelma McManus Kindergarten	Plymouth State College 1954	3,800
Mrs. June Merrill Grade 1 (working towards certification)	Plymouth State College 1969	6,400
Mrs. Barbara Soper Grade 5	Olivet College 1966	6,400
Miss Sharon Walsh Grade 4	Keene State College 1968	6,150
Mrs. Patricia Young Grade 2	New England College 1969	5,900

ASSISTANT SUPERINTENDENT'S REPORT

The Sixties in all their acclaim — good and bad — had their affect on schools as they did all other segments of our society. And as people look to the Seventies for some ray of encouragement for things in general, so do those of us in schools. It is easy, as one reflects on what has transpired in recent years to become somewhat pessimistic and hold out little hope for the future of public schools. One merely needs to quickly list such things as student unrest, teacher militancy, inflation, increasing standards for schools, narcotics, etc. to easily see why such an attitude could prevail. Yet, to quickly relegate all to the pessimistic heap is to ignore the good that has been done and what, with reasoned effort, can take place in the future. The increasing efforts of teachers to develop better ways of meeting the educational requirements of their students, the improved quality of some of the materials now available to us, and the willingness to face up to the challenges to our school system tends to ward off feelings of pessimism and bring about a feeling of accomplishment.

I am tempted to relate to you the kinds of things we are doing that I feel hold promise for the years to come. No doubt I will slip a little in that direction, but for the major part of this report I would like to direct my efforts to an overall discussion of some of the ideas that will lead us into the Seventies. Often times we are accused of overworking the idea that what we need is for the good of the students when we are attempting to get a budget or a program passed. And although at times this tack is overplayed, it nonetheless should be a basic motivating purpose to what it is we are attempting to accomplish. Schools are a part of the society and they serve the needs of the society. This is a responsibility we recognize. Yet, they directly serve the needs of the young people who attend and who, in time, will make up our society through not only by being around, but more so in the way they go about fulfilling their responsibilities as members of the society. And it is this ultimate consideration that must be kept in mind as we go about the business of developing the school system.

It was our concern for the type of educational opportunity we were offering our young people that prompted the development of the CAPE Project. The acceptance of this program by all concerned has resulted in a new concern for what it is we do for children. For those teachers directly involved in the project a renewed vigor has been created. Within many of our schools we have committees studying the reading programs we now have in a concerted effort to bring about greater coordination, a more unified program, a program that will eliminate those gaps that cause many of the child's reading difficulties and explore the utilization of some of the new programs developed for teaching children how to read. This represents an ambitious undertaking, but if we are to do the job in reading as we should then it is a high priority item. CAPE has also seen the attempts of teachers to try new approaches in other areas. Most noteworthy is the process of team teaching that has been tried this year. This is simply an effort by a group of teachers to use their talents to the best advantage in planning an educational program for the children in a certain grade or subject area. Also, a number of new materials have been made available through the CAPE Project for classroom trial. Rather than base materials selection on the plaudits of advertising companies, we are trying these items out in actual practice. We hope that this will lead us to making better choices in the types of materials we use for instructional purposes.

The coming year will see a concentration by CAPE in the area of vocational education. With the apparent imbalance in our curriculum in programs for students with various needs and abilities, the importance of a good and relevant program in the vocational area ranks high in importance.

The new Elementary Standards are going to pose a number of dilemmas for our area. For each community it will require a thorough examination of its elementary program, and the development of a plan that will provide for meeting the requirements that are part of the new standards. Briefly scanning the list of requirements we note:

1. New services such as guidance, library facilities and materials, health and special education.
2. Subjects offered to include — in addition to usual things — physical education, art, and music.
3. Facilities to house these required programs, if not currently available.
4. And then a number of related items such as class size, inservice education, school philosophy and adequate staff and administration.

Obviously we have much to do. At this point we have developed a survey form to determine how our schools stand in relation to these standards. From this we will prepare recommendations as to how we may best approach this problem. Although we have not completed our work as yet it seems reasonable to say that our thought will be to develop a phased program that will space itself out over a period of time rather than to attempt a crash program that will yield little and cost much.

Now to look ahead with a one man brainstorming session. The preceeding copies are with us. They are fact. Yet the methods of achieving some of our needs is a point requiring much thought. I knew that if I were to mention the word cooperative it would raise some eyebrows. Yet for some, this still may be an avenue of approach. Be that as it may, the fact still remains that because each of our districts are small we must pursue a course that will allow us to provide a reasonable program at a cost that is not prohibitive. One approach that seems worthy of consideration at this juncture is shared services. By this I simply mean the sharing of programs and services by the districts within this Union. The first example of this is the proposed sharing of a program of special education for the mentally retarded child by all the communities in this Union. This proposal is something upon which you will be asked to vote at your Annual Meetings. It is this kind of approach that may help us to meet some of our needs

in lieu of other ways. Let me suggest some other areas in which the idea of shared services may be explored.

First, we all share a vital concern about the many apparent problems we have in reading. We hear much about the need for a remedial reading teacher. I submit that the need for such a highly specialized person is not as great as is the need for a person who has the expertise to develop and supervise a sound reading program that will meet the needs of all concerned. Such a person would be expensive for one community, but might be something on a shared basis that could help us in this area.

A second area is that of vocational education and/or related programs. We now have a tremendous duplication of facilities among our schools as well as a concern that what our programs are providing may not be as relevant to our students' needs as they should be. Thus, the idea to perhaps share facilities and personnel. That is, each school might offer different programs, and for a certain part of a day students could attend the program they have elected in the school where it is available. This, obviously, would require considerable study. The CAPE committee this year will address itself to this as well as other topics on this subject.

Finally we are rapidly approaching the era (for lack of a better word) of the extensive use of audio-visual materials. These are rather expensive items — both the teaching materials and the equipment with which to use them. At the same time the preparation of materials that fit into our programs and the technical use of some of the equipment requires time and training that we do not have an abundant supply of. Here again we see an area of possible shared effort something on the order of the Instructional Materials Center in Hampton, N. H., whereby we could produce materials, have a distribution center for various items and have a person with the technical know how to assist teachers in the use of this material.

The point of these thoughts is to say to you that with the costs of education being what they are, and the relatively

small size of our school systems it seems logical to explore ways in which we can still provide a sound program and yet not become economically inefficient in so doing. You will hear from us on this topic in the near future.

Our intent is to develop the kind of school system that will do the best possible for each child in it. This rather idealistic statement is really what it is all about. The moment we lose sight of it, then any of the recommendations we put forth will lose a great deal of their meaning and significance. We believe in the individual child and much of our direction is aimed at meeting his particular needs. He needs discipline, but he also needs compassion and understanding. It is towards this degree of understanding that we are moving. For some reason schools seem to lag. We are trying to overcome that lag through a reasoned approach.

In closing, I would like to call your attention to a small booklet published by the American Association for School Administrators entitled *A Climate For Individuality*. It contains much that causes one to think. Two short paragraphs that don't necessarily relate closely to this report nonetheless leave one with something on which to ponder. (The opening sentence refers to the book not this report.)

"Perhaps some who read this will see in it an image of a soft, "idealistic" world where children are petted, pampered, and given too much. We are so accustomed in these days to the harsher strains of talk of forced growth, and a frenzied pressure upon youth, that anything else sounds weak and mild. Many adults, frightened by a world they themselves have created in major respects, are frantically determined to set rigid patterns of content and common standards of achievement which are unsound, unrealistic, and dangerous. They seem determined to impose on the next generation rigid standards which border on a sadism born of fear and frustration.

But our image is of another sort. It is an image of a child with a secure base to operate from as he forays out into a

world that may be tough; a child with an accumulating reserve of experience that carries him courageously into new and risky ventures; a child with a concept of himself that nerves him to dare. It is anything but a soft and sentimental picture. For it assumes that life takes strength, and it is based on faith that a rugged inward strength can grow to a level of power most men never know they have."

DOUGLAS H. BROWN,

Assistant Superintendent
